To Whom It May Concern:

Before switching over to Pro-Vet Logic products, our shelter was constantly battling with canine parvovirus and upper respiratory outbreaks. Since we have started using the Pro-vet logic products to clean, we have seen a dramatic decrease in canine parvovirus and upper respiratory infections. We also don't experience the overwhelming chemical odors that were associated with the chemicals that were previously used to clean our facility.

I am absolutely amazed by the quality of these product and highly recommend them for use in the shelter environment!

Thank You,

Heather Carlin
Animal Control Officer
