

ProVetLogic STABLE Environment HOT ZONE Bulletin A safe and environmentally friendly solution for the Zoological Industry

Many of the surface materials used in the design and construction of animal habitats are extremely porous and can harbor odor and disease-causing microorganisms. These surface materials may include:

- Wood Stalls, Walkways, Bridges and Shelters
- Concrete Floors, Walls and Walkways
- Landscape and Habitat Rock Structures
- Brick Walls & Walkways
- Synthetic Floors, Walls & Turf
- Loose Soil & Grassy Areas

Using **STABLE Environment** as part of your regular cleaning protocol will:

Minimize the risk of polluting the environment:

Help protect sensitive species:

Mammal population declines have been correlated with organochlorine pollution. Moreover, numerous studies have attributed reproductive and nonreproductive disfunctions in mammals to EDC (Endocrine Disrupting Chemicals) exposure.

STABLE Environment is formulated with non-EDC ingredients.

Solubility

Biodegradability

Flash Point

A key contributor to environmental pollution is the run-off created by cleaning solutions that enter sensitive waterways during the cleaning process. The impact on aquatic life can have a long-lasting effect on the fragile ecosystem.

The ingredients in STABLE Environment have been specifically selected for cleaning in sensitive environments.

Common Pathogens that can be Found in Embedded Organic Matter

Bacteria

Salmonella spp Yersinia enterocolitica Campylobacter jejuni **Bacillus** piliformis Clostridium spp Mycobacterium spp Shigella spp

Protozoa

Isospora spp Sarcocystis spp Besnoitia spp Hammondia sp Toxoplasma sp Giardia sp Trichomonas spp Entamoeba histolytica **Balantidium coli** Cryptosporidium spp

Fungi

Histoplasma capsulatum Aspergillus spp Candida albicans phycomycetes

AVAILABLE IN THESE SIZES

One Gallon 2.5 Gallon Easy Pour 5 Gallon Pail 55 Gallon Drum

PRODUCT SPECIFICATIONS Phosphate None Complete in water Excellent Rinsability

Complete None
